The image depicts a diagram of a Theremin reference oscillator, select and compare electronics. It includes Antennas and local oscillators, with connections to the left wooden plate and right wooden plate, indicating vertical and horizontal antennas. The diagram also shows connections to the left and right hands, with I2C and Serial interfaces, leading to WiFi 802.11g. The diagram includes detailed components like PC multiplexers and a PC controller, with addresses 0 and 1. The contact mics are connected to the mic preamps.
